

MANUAL NOTCH-CUTTING MACHINE

Our motorized broaching machine is a self-contained floor-mounted machine, specially designed for cutting 'V' and 'U' notches in standard 10mm square, sub-size and 0.45" diameter specimens.

Our V/U Notch Broaching Machines are suitable for ferrous & nonferrous material for sample preparation of 'V' or 'U' notches for Impact Testing Machine.

Features:

- Cut the notch precisely.
- Specially designed multi-toothed broaching blade.
- Simple, precise, accurate & reliable.
- Equipped with broach guard for safety.
- Easy removal & assembly to broaching blade.
- Micrometer for fine adjustment.
- Front door access for easy maintenance.
- Excellent notch finish & Excellent Repeatability

TECHNICAL SPECIFICATIONS		HBM-2
Driving Mode	Manually Operated	
Broach	V / U (Standard 2mm Depth)	
Specimen Dimensions	10x10x55mm (Standard Dimensions)	
Broach Stroke	325mm	
Dimensions	600x500x1000mm	
Weight	100 Kgs (Approx.)	
One Blade, "V" Type fitted with the machine ("U" Type Optional), Extra Broach as Spare Part Available
