

# PRECISE SPECIMEN-CUTTING MACHINE

ISO 9001 : 2015

## **DESCRIPTION**

Model HETACUT-5 Precise Cutting Machine can be used to cut non-metallic material, circuit board, semiconductors, super hard material etc. The cutting precision can reach 0.01mm. The machine is equipped with many jigs, which make it possible to cut samples with irregular shape. It is an ideal precise cutting machine for scientific research institutes and industrial enterprises.

### **FEATURES:**

- Closed transparent protective cover and emergency safety switch, which can provide protection for the operator and facilitate observation.
- Accurately fine regulating the feeding speed of the processed object through the gravity loading system to reduce sample damage.
- Closed loop control cutting to prevent overload from burning out motor, circuit, etc.

• When the sample cutting is completed, the cutting machine will stop automatically, which can realize unattended processing.

ISO 9001: 2015

- Use ultra-thin cutting blades, such as 0.4mm thick diamond cutting blade, and the sample moves laterally with a precision of 0.01 mm, which can realize the precision cutting of the sample.
- 7 sets of different sample fixtures to meet the cutting requirements of different samples.
- Large-size circuit board table cutting device (optional) is convenient for large-size sample preparation and cutting of sheet materials, circuit boards, glass, etc.
- Sintered diamond cutting blades are used to easily cut glass, circuit board, rock, and other hard materials.
